KEY SKILLS

- **Languages:** C#, Java, TypeScript, JavaScript, Python, SQL, KQL
 - **Technologies:** Azure, AWS, .NET, Docker, React, Node.js, Spring, Flask
 - **Tools:** Git, GitHub, GitHub Actions, Postman, Gradle, Jest, Maven, Linux
-

EXPERIENCES

SOFTWARE ENGINEER II, Microsoft (Redmond, WA) Sept 2026 – Present

- Working on Agentic Security.

SOFTWARE ENGINEER, Microsoft (Redmond, WA) Jan 2025 – Aug 2026

- Subject matter expert for a Microsoft Sentinel infrastructure service that handles more than 10 million requests a week.
- Designed and implemented a first-party and third-party packaging framework for Microsoft Sentinel Graph
- Designed and established the Data Catalog architecture for Microsoft Sentinel Data Lake.
- Integrated AI skills and workflows with Azure SRE Agent, cutting incident triage from up to an hour to minutes.
- Drove infrastructure improvements that reduced recurring incidents.

SOFTWARE DEVELOPMENT ENGINEER, SunPower Corporation (Bellevue, WA) Mar 2023 – Sept 2024

- Worked with engineering, PMs, and UI designers on a React and Java loan and lease origination system used by thousands of customers across the U.S., handling more than \$25 million annually.
- Designed and implemented API key management and authentication for third-party client access.
- Led the end-to-end development of a significant feature (Change Order), from initial requirement gathering with the product team through design and implementation to finishing with a successful production release.
- Helped design and roll out RBAC and OTP authentication so applicants could continue without creating an account.
- Rolled out LaunchDarkly to more than 10 microservices and improved maintainability by about 20% with modular schemas.
- Implemented robust data validation mechanisms for large-scale data models, fortifying security across request payloads.

SECURITY ENGINEER, Amazon (Bellevue, WA) July 2022 – Jan 2023

- Created an ML-based anomaly model to identify users with an unusual number of HTTP requests.
- Designed and implemented a system to cluster security issues in a date range.
- This feature will help security engineers prioritize solutions focusing on top risks in Alexa, reducing turnover time by **50%**.

SECURITY ENGINEER INTERN, Amazon (Bellevue, WA) May 2021 – Aug 2021

- Designed and implemented an intelligent sampling model for data loss prevention.
- The ML model helped to catch clusters, which can result in data loss 99% of the time, thus reducing the overall risk by 99%.
- The initial pilot projected cost savings of **\$270k/month** for the service team.

FULL STACK SOFTWARE DEVELOPER, Honors Dept. (Fort Collins, CO) Sept 2019 – May 2022

- Maintained and updated the website with various online services with over 1700 daily active users.
- Designed and implemented the online process for the Formal Thesis, which was previously based on papers.
- The front end uses MojoPortal and Bootstrap & the back end uses C#, .NET, and MS SQL Server.

RESEARCH ASSISTANT, CS Dept. (Fort Collins, CO) Aug 2019 – Jan 2022

- Inspect data quality from six organizations through our tool to find anomalies.
 - Upgrade **Python** code to improve the efficiency of the tool based on the inspection results.
 - Worked on a tool that can find faults in data accurately without consulting the client, thus saving **2-3 days** of the client's time.
 - One of the four authors of the [paper](#) published at the IEEE Big Data 2020 conference.
-

EDUCATION

Bachelor of Science in Computer Science (Summa Cum Laude) with Mathematics Minor
University Honors Scholar

Colorado State University (CSU), Fort Collins, CO

2022
GPA: 4.0

PROJECTS

TRIP PLANNER (React, Java, CSS, GitHub, Node.js & NPM)

- Created a single page, mobile application, and microservices similar to Google Maps, where users can plan a trip.
- Semester-long project in a team-based Agile software development environment.

MULTIPLAYER CHESS GAME (React, Java, CSS, GitHub, Node.js & NPM)

- Create a mobile responsive, single-page Multiplayer Chess game with microservices.
- Implemented secure user authentication with hashed passwords & Auth Tokens for seamless gameplay between users.
