KEY SKILLS

- **Languages:** C#, Java, TypeScript, JavaScript, Python, SQL, KQL
- **Technologies:** Azure, AWS, .NET, Docker, React, Node.js, Spring, Flask
- **Tools:** Git, GitHub, GitHub Actions, Postman, Gradle, Jest, Maven, Linux

EXPERIENCES

SOFTWARE ENGINEER II, Microsoft (Redmond, WA) Sept 2026 – Present

- Working on Agentic Security.

SOFTWARE ENGINEER, Microsoft (Redmond, WA) Jan 2025 – Aug 2026

- Subject matter expert for a Microsoft Sentinel infrastructure service that handles more than 10 million requests a week.
- Designed and implemented a first-party and third-party packaging framework for Microsoft Sentinel Graph
- Designed and established the Data Catalog architecture for Microsoft Sentinel Data Lake.
- Integrated AI skills and workflows with Azure SRE Agent, cutting incident triage from up to an hour to minutes.
- Drove infrastructure improvements that reduced recurring incidents.

SOFTWARE DEVELOPMENT ENGINEER, SunPower Corporation (Bellevue, WA) Mar 2023 – Sept 2024

- Worked with engineering, PMs, and UI designers on a React and Java loan and lease origination system used by thousands of customers across the U.S., handling more than \$25 million annually.
- Designed and implemented API key management and authentication for third-party client access.
- Led the end-to-end development of a significant feature (Change Order), from initial requirement gathering with the product team through design and implementation to finishing with a successful production release.
- Helped design and roll out RBAC and OTP authentication so applicants could continue without creating an account.
- Rolled out LaunchDarkly to more than 10 microservices and improved maintainability by about 20% with modular schemas.
- Implemented robust data validation mechanisms for large-scale data models, fortifying security across request payloads.

SECURITY ENGINEER, Amazon (Bellevue, WA) July 2022 – Jan 2023

- Created an ML-based anomaly model to identify users with an unusual number of HTTP requests.
- Designed and implemented a system to cluster security issues in a date range.
- This feature will help security engineers prioritize solutions focusing on top risks in Alexa, reducing turnover time by **50%**.

SECURITY ENGINEER INTERN, Amazon (Bellevue, WA) May 2021 – Aug 2021

- Designed and implemented an intelligent sampling model for data loss prevention.
- The ML model helped to catch clusters, which can result in data loss 99% of the time, thus reducing the overall risk by 99%.
- The initial pilot projected cost savings of **\$270k/month** for the service team.

FULL STACK SOFTWARE DEVELOPER, Honors Dept. (Fort Collins, CO) Sept 2019 – May 2022

- Maintained and updated the website with various online services with over 1700 daily active users.
- Designed and implemented the online process for the Formal Thesis, which was previously based on papers.
- The front end uses MojoPortal and Bootstrap & the back end uses C#, .NET, and MS SQL Server.

RESEARCH ASSISTANT, CS Dept. (Fort Collins, CO) Aug 2019 – Jan 2022

- Inspect data quality from six organizations through our tool to find anomalies.
- Upgrade **Python** code to improve the efficiency of the tool based on the inspection results.
- Worked on a tool that can find faults in data accurately without consulting the client, thus saving **2-3 days** of the client's time.
- One of the four authors of the [paper](#) published at the IEEE Big Data 2020 conference.

EDUCATION

Bachelor of Science in Computer Science (Summa Cum Laude) with Mathematics Minor
University Honors Scholar

Colorado State University (CSU), Fort Collins, CO

2022
GPA: 4.0

PROJECTS

TRIP PLANNER (React, Java, CSS, GitHub, Node.js & NPM) (More info can be found [here](#))

- Created a single page, mobile application, and microservices similar to Google Maps, where users can plan a trip.
- Semester-long project in a team-based Agile software development environment.

MULTIPLAYER CHESS GAME (React, Java, CSS, GitHub, Node.js & NPM) (More info can be found [here](#))

- Create a mobile responsive, single-page Multiplayer Chess game with microservices.
- Implemented secure user authentication with hashed passwords & Auth Tokens for seamless gameplay between users.
